Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to methods of inducing low density lipoprotein (LDL) receptor expression using modulators of p42/44 MAPK, classified in class 514, subclass 789.
- II. Claims 4-5, drawn to methods of screening for modulators of said LDL expression, classified in class 435, subclass 15.
- III. Claim 6, drawn to methods of determining the level of LDL expression using DNA encoding said MAPK, , classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I-III are patentably distinct each from the other because each method has different steps and different end-points.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter as shown by their separate classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1652

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
